# THE PLACE TO START OR GROW YOUR BUSINESS

The Mid-America Science Park (MASP) is one of the most comprehensive science parks in the country, consisting of three interconnected centers: the Business Incubation and Acceleration Center, the Training and Workforce Development Center and the Worldwide Communication and Conference Center.

The Business Incubation and Acceleration Center provides a dynamic environment designed to help emerging growth companies succeed. Incubation features include:

- Customizable wet and dry labs (30)
- Rapid prototyping equipment
- Fully-equipped machine shop with water jet cutting services
- Advanced computing facilities and fiber optics capabilities
- Audio-visual technology with worldwide connectivity
- Unlimited Internet bandwidth
- World-class conference and training space
- Breakout rooms (4)

## Business Incubation and Acceleration Center

MASP supports entrepreneurs and existing businesses with a combination of state-of-the-art facility and innovative business programs. Our on-site team offers guidance and resources for assisting clients with their development needs, integration into the community, networking with partners, and building stakeholder support.

The Mid-America Science Park offers 112,000 square feet of innovative space with an additional 19 acres reserved for expansion. The Park is located 30 miles north of Louisville, Ky., and 80 miles south of Indianapolis. Find out more at [www.maspark.org](http://www.maspark.org).

*"We would, without hesitation, recommend Mid-America Science Park to any company who is in the incubator or accelerator phase of growth. Mid-America Science Park is an exceptional value with the right amenities and staff with a "can do" attitude. We are very pleased with our decision to make Scottsburg our home and look forward to a lasting relationship."*

- David M. Coates, Executive Vice President, LEMER PAX USA, INC

## Incubator

Specialized amenities and new business services support inventors throughout the critical phase of product development. Within the incubator, 30 customizable wet and dry lab spaces stand ready to accommodate clients' entrepreneurial requirements.

Research projects are facilitated by the park's advanced computing facilities as well as photovoltaic and solar thermal energy technologies. Potential customers and university resources are within easy reach through the Worldwide Communication and Conference Center and video conferencing equipment available within individual labs.

## Accelerator

MASP's on-site accelerator facilities ensure a smooth transition into production and viable business enterprise. After invention, successful start-ups receive guidance in dealing with the challenges of advancing a prototype to market, including supply chain management, human resources, financing, marketing and sales. MASP can also connect entrepreneurs with professional service providers who offer valuable advice and support.
